

How to use the Log2EDL converter?

Add a second shortcut to every button wich change the input.

The parameters of shortcut are:

- Function: WriteDurationToRecordingLog
- Value: IN001, IN002, IN003 IN019, IN020

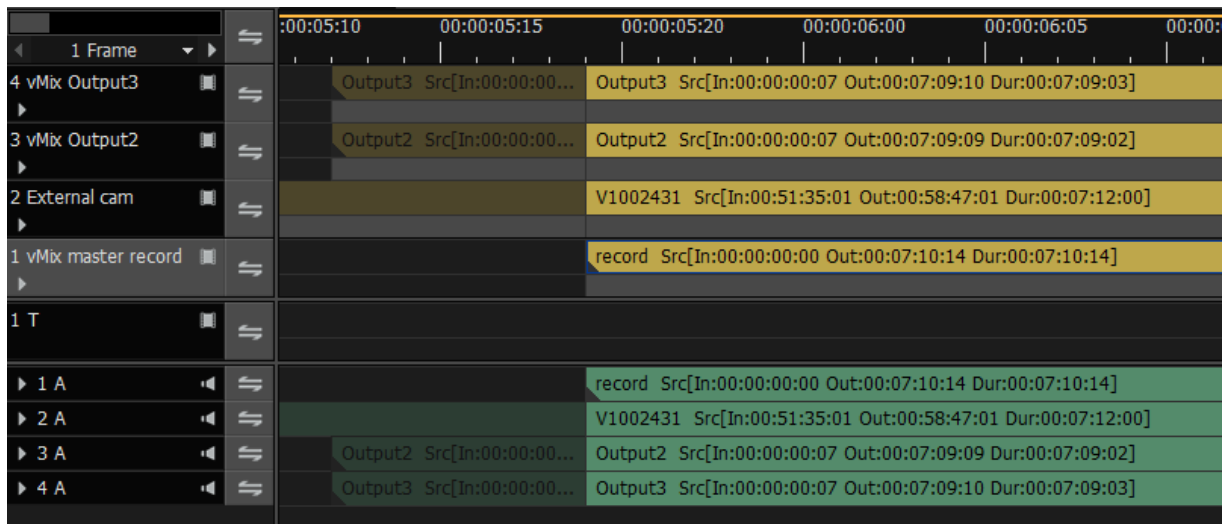

This is my shorcut list for the inputs.

All	Keyboard	MIDI	Surface	Joystick	Find
Key		Function	Duration	Input	
<input checked="" type="checkbox"/>	log-cam1 (1:0)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 1 (1:0)	Fade	200	1 Input	
<input checked="" type="checkbox"/>	log-cam2 (1:1)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 2 (1:1)	Fade	200	2 Input	
<input checked="" type="checkbox"/>	log-cam3 (1:2)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 3 (1:2)	Fade	200	3 Input	
<input checked="" type="checkbox"/>	log-cam4 (1:3)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 4 (1:3)	Fade	200	4 Input	
<input checked="" type="checkbox"/>	log-cam5 (1:4)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 5 (1:4)	Fade	200	5 Input	
<input checked="" type="checkbox"/>	log-cam6 (1:5)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 6 (1:5)	Fade	200	6 Input	
<input checked="" type="checkbox"/>	log-cam7 (1:6)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 7 (1:6)	Fade	200	7 Input	
<input checked="" type="checkbox"/>	log-cam8 (1:7)	WriteDurationToRecordingLog			
<input checked="" type="checkbox"/>	Input 8 (1:7)	Fade	200	8 Input	

The recording process:

1. Start multicorder and/or the external cameras
2. Start the record of vMix *** It's important to start the recording last. ***
3. After the recording you find a log file next to the recorded file in the 'logs' folder.
4. Open your editor software
5. Synchronise the multicorder files and/or external cameras to the recorded file of vMix
6. Cut the recorded videos.

7. Note the starting timecode of the inputs/videos.
8. Visit <https://log2edl.com/>
9. Upload the vMix log file
10. Enter the following information:
 - Master delay
(Depending on the performance of your computer, 1-5 frames. Test, please.)
 - Frame rates of the your project
 - Name of your editor software
 - Number of video inputs
 - Name of the recorded files
(cannot contain spaces)
 - Start time code of recorded files
11. Click the 'Convert' button
12. Download your EDL and marker files
13. Import the EDL file to your editor software

Using Custom Markers

Add shortcut to vMix. The parameters of shortcut are:

- Function: WriteDurationToRecordingLog
- Value: any text

Log2EDL automatically creates the marker list with EDL.

Import the marker list file to your editor software.

The import is currently fully functional with Edius and Davinci Resolve.

Questions and answers

How to import EDL file in Adobe Premier?

1. Right click in your project bin, select Import...
2. Select the EDL file -> Import
3. Set the video standard -> OK
